

P-SQR's Calibration Field Experience:

With nearly 20 years of hands-on experience in calibration lab software development, P-SQR has been providing calibration software solutions to many of the STQC labs, NABL accredited labs, plant instrumentation labs and even some of branded calibrator manufacturers.

Proven Success:

Our lab Calibration Management Software **SoftLAB** is being used in high-performance organizations such as ETDC, FCRI, L&T, Other NABL Labs PAN India. **SoftLAB - UNI** is being used in Process Plants Like NTPC, Refinery plants largely.

SoftLAB - UNI Calibration Management Software helps you to meet out daily, monthly calibration schedule for plant devices, perform scheduled calibration activity and hence produce calibration report for each device.

SoftLAB UNI - Highlighted Features:

- [Plant based Device Calibration Maintenance](#)
- [Calibration Due Reminder Popup](#) for total plant devices.
- [Device History Library](#) for each plant device.
- [Detailed Device Settings](#) for all plant devices.
- [Calibration Data Entry Module](#) for entering observed calibration data points.
- [Certificate Generation Module](#) for Calibration certificate generation as per standard format.

**Dedicatedly Designed for Plant
Calibration Lab Management**

Calibration Management Software

SoftLAB - UNI Highlighted Modules

Calibration Due Tracker Module	Detailed Device Settings	Device History Module	Manual Calibration Entry Module
--------------------------------	--------------------------	-----------------------	---------------------------------

SoftLAB - UNI completely eliminates

Repeated Excel Entry of Device Information	Manual Due Checking	Manaul Report Preparations	Searching Report Documents
--	---------------------	----------------------------	----------------------------
